

# Dave's Blarg!

2011-Nov-05

Today Ruled!!! But the sad part is that all the cool parts were too dark to take pictures of ☹ We had a blast setting up the laser obstacle course, but we really had to hotbox it with the fog machines to make it come out, that being said, when it did work it was \*AWESOME\*, but we had to have the room too dark to take pictures in

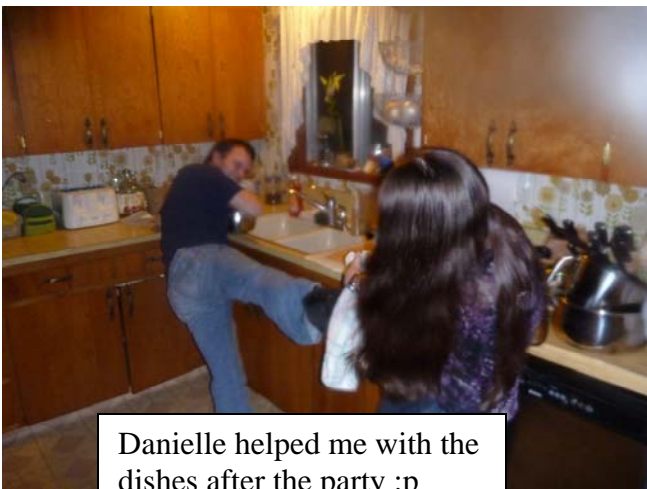

Hanging up a mirror, I got a crazy deal on security camera mounts :D

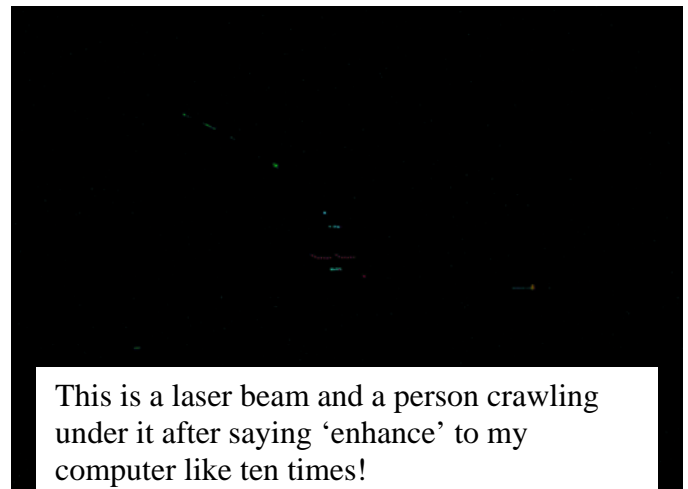

Dana's cake was like a solar flare :D (or I need to learn what some of the buttons on my camera are for, dot , dot, dot

Dana's cake even smoked ☺ I might have to switch to a haircut like that fella soon..

Danielle helped me with the dishes after the party :p

This is a laser beam and a person crawling under it after saying 'enhance' to my computer like ten times!

to be able to see the laser ☹️ \*any\*how, Dana's birthday was a blast (and tangled is a good movie) Thanks to everyone who wrote back! You are all awesome and interesting! (Especially Uncle Joe! I had no idea!)

I hope that you're all having a great weekend!
