

# Dave's Blarg!

2011-Nov-07

Thanks for all the pictures everyone sent back!! I got everything from roses to cars to fireworks to .... Airplane \*ahem\* bags.... :p Today started with a ruckus workout with Danielle, although due to a terrible miscommunication I showed up ready for a swimming workout and she showed up for a real workout. We managed to compromise, but sadly the hot tub was closed when we got there. ☹

All I can say is, there must be a \*ton\* of gain in this picture

What do you mean wardrobe malfunction?

Erin says "hi Dave, you're looking a bit heavier.."

Underwater, \*I\* can hear me scream :p

At least the pools were open, so we got too try out underwater mode a bit more ☺

And I saw Erin, she is Rachel and I's favorite gym café person (she manages it). I used to have her paid off to sneak extra cheese into Rachel's breakfast wrap when we were having a weight loss race. Then again, Rachel always seemed to win... HMMMMMMMMM, dot, dot, dot

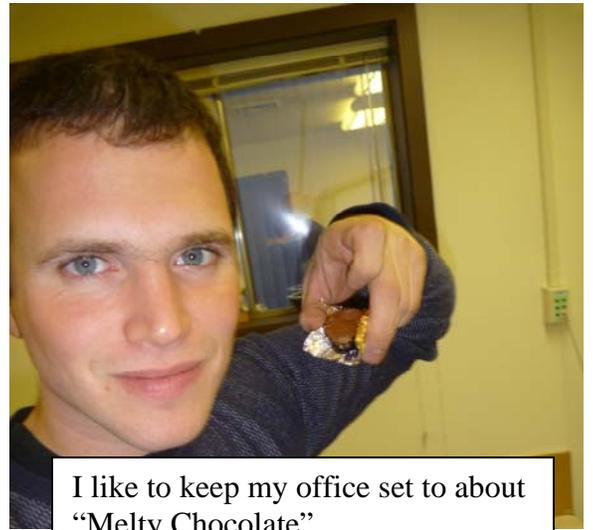

Okay Crane...

We also made some cool cranes ☺  
Danielle's was okay, but mine was awesome! ☺

\*Awesome\* Crane!

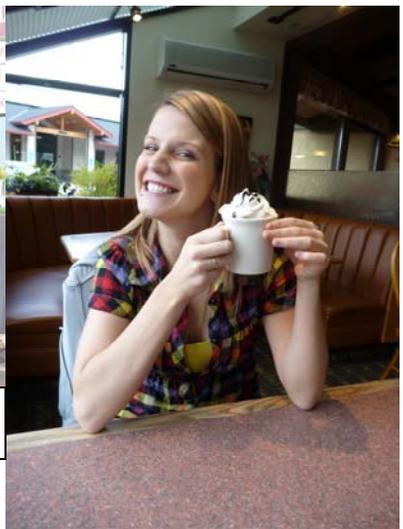

Then it was off to work. It was pretty non stop excitement driving the computer all day, so I'll skip ahead a bit-oh wait!! By the by, one of the many intangibles that makes me love my job is individual office climate control (I'm talking to you, cube people), I get to keep my office at whatever temperature I want. I know it seems like a small thing, but there are so many who are denied this basic staple of happiness.

I like to keep my office set to about "Melly Chocolate"

It was a hot chocolately lunch, the best kind ☺

I had lunch with my ruckus friend Sarah Dee, which brings me to the quote of the day!!! (I guess it's the second quote of the day of the... month.. Hmmm) In discussing a guy we

know: “I don’t think he wants to be married, he just wants to have kids”.  
Hmm, doesn’t sound as funny now, I’ll dig harder tomorrow 😊  
Okay, so some pictures are worth a thousand words, but some also have lessons in them, this picture has like a dozen!

What do you mean you can run out of hypothetical gas?!

- 1 – The trip odometer isn’t a substitute for finally fixing the gas gauge
  - 2 – Although it might be if you fill up at (almost exactly) 186 instead of 200
  - 3 – I should fix my gas gauge at some point...
  - 4 – An \*awesome\* place to run out of gas (not that it’s ever happened to me! I mean hypothetically...) is 100 yards from the gas station (especially if you are still moving and there’s a hole in traffic so you can drift up to like 10 yards from the pump!!
  - 5 – Sarah is an awesome friend!
  - 6 – It’s important to have an awesome friend in the car, just in case you (hypothetically!) run out of gas :D
- Okay, that’s like half a dozen, but those are some quality life lessons (don’t forget the one about Sarahs! They’re cool!)

That's all for today! Thanks again for all the pictures! (And the update!), and you should still send one if you haven't (you know who you are! That's right, you! Right there! ;)

Dave
